The finality of claims 1-20 and 26 -27 set forth in the final rejection of 7/31/03 has been withdrawn in view of the below office action:

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the plurality of sectors as recited in claims 1-17 and 26-27; the (MxN) array with M and N both at least equal to two and the (PxN) array with P at least equal to one as recited in claims 18-20 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "100" and "101" have both been used to designate memory cell array block. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-17 and 26-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 1-17 and 26-27 are rejected because the plurality of sectors are not shown in the drawings of the present invention and the feature "electrically all the memory cell transistors in sectors together" is not described in the specification.

Claims 18-20 are rejected because the feature of "the (MxN) array with M and N both at least equal to two" and the feature of "(PxN) array with P at least equal to one" are not shown in the drawings of the present invention and are not described in the specification.
